WORKSHOPS FOR HACKIDS

The Hackerspace in Strassen hosts workshops for kids, usually the first Tuesday of every month. The topics are varied, recent ones included building robots that wrestle one another (photo), giant soap bubbles and rocket science. Workshops are announced on *hackids.hackerspace.lu* at least two weeks ahead. "*To register, you have to be at least 10 years old (no limit upwards). Parents are, of course, welcome too,*" says leader Marc Teusch. "*We'll also be doing some summer specials from July 15 on.*"
